

Census Day – 7 March 2023

Your data can help your community.

The census is a nationwide survey to help understand more about life in Aotearoa New Zealand and how it is changing.

It is important because it helps iwi, community groups, local and central government, and businesses make decisions about services that affect you, your whānau, and your community.

Learn more about the census and how taking part helps your community at www.census.govt.nz
